Projects

Driver4U

1. Developed a cross-platform mobile application, Driver4U, using **React Native** for providing location-based transportation services.
2. Utilized TailwindCSS to design a modern and responsive user interface, enhancing style management and consistency.
3. Integrated **Expo** and **Expo Router** to streamline development and manage navigation within the app.
4. Implemented dynamic fare calculation based on real-time distance between the user's location and destination using **Google API for Maps**.
5. Managed state efficiently with **Redux**, ensuring seamless data handling and real-time ride updates for users.

Gloriousfood

1. Developed a comprehensive order management system, enabling users to view, increment, decrement, or remove items from their orders in a seamless interface.
2. Implemented secure credit card management functionality using **React Native Credit Card Input**, allowing users to save and manage their card details securely.
3. Integrated **JWT** for user session management and secure logout processes, enhancing user authentication and data protection.
4. Designed a clean, modern UI with purple tones, providing a visually appealing experience.
5. Utilized **React Native** for mobile development, **Redux** for state management, and **AsyncStorage** for secure user data storage.

Experience

JANUARY 2021 - NOVEMBER 2021

Software Internship | AlberkQA Academy | Istanbul Atasehir

Efficiently archived and organized numerous files using Excel for accurate record-keeping and easy retrieval, while also conducting candidate interviews on behalf of the academy for those who passed certification exams, ensuring a smooth evaluation process.

Skills

Database management • Team player • Excellent time management skills • Conflict management • Data analytics
