EXPERIENCE

Alberk QA Company

January 2021 - November 2021, Istanbul Atasehir

Software Intern

- Efficiently archived and organized numerous files using Excel, ensuring accurate record-keeping and easy retrieval of information.
- Conducted interviews on behalf of the academy for candidates who passed the certification exams, facilitating the evaluation process and ensuring a smooth candidate experience.

PROJECTS

Weirdstore

Description: Developed "WeirdStore," a unique e-commerce platform designed to offer a diverse range of products in a visually engaging and user-friendly environment. The project focuses on delivering a seamless shopping experience with advanced features for both customers and administrators.

- Users can browse and search through a wide variety of products with detailed descriptions and images. React, Tailwind CSS used.
- Robust system for managing and reviewing items before checkout. Node.js, Express.js used.
- Facilitates easy order processing and tracking, MongoDB used.
- Secure authentication, account management and order history tracking. Redux Toolkit used.

WhatsFav

Description: Developed "WhatsFav," a dynamic application that allows users to discover, track, and manage their favorite movies and TV shows. The project integrates various features to enhance user engagement and streamline media management.

- Provides users with personalized suggestions based on their viewing history and preferences.both frontend and backend development.
- Enables users to easily add, view, and organize their favorite movies and shows.
- Implements an advanced search functionality for users to find specific titles quickly.
- Includes secure login and registration processes for personalized user experiences.
