Projects

Weirdstore

1. Users can browse and search through a wide variety of products with detailed descriptions and images. React, TailwindCSS used.
2. Robust system for managing and reviewing items before checkout.
3. Utilized Node.js and Express.js for backend development, focusing on building scalable APIs, managing server-side logic, and ensuring efficient handling of client requests and data processing.
4. Implemented Redux Toolkit for secure authentication, efficient account management, and seamless order history tracking.

Whatsfav

1. Developed a system that provides users with personalized suggestions based on their viewing history and preferences, handling both frontend and backend development.
2. Enabled users to easily add, view, and organize their favorite movies and shows with a user-friendly interface and efficient backend management.
3. Implemented advanced search functionality, allowing users to quickly find specific titles with enhanced filtering options.
4. Integrated secure login and registration processes to offer personalized user experiences while ensuring data privacy and protection.

Cryptoasc

1. Developed a fully responsive cryptocurrency analysis platform using React, React Router DOM, and Tailwind CSS. The platform includes interactive charts powered by Chart.js and React-Chartjs-2 for analyzing various cryptocurrencies.
2. Implemented detailed exchange information and integrated real-time cryptocurrency market data through the CoinCap API.
3. Provided users with the latest cryptocurrency news using the NewsData API.
4. Utilized Redux Toolkit for state management and Moment.js for efficient date handling to enhance the overall functionality and user experience.

Experience

JANUARY 2021 - NOVEMBER 2021

Software Internship | AlberkQA Academy | Istanbul Atasehir

Efficiently archived and organized numerous files using Excel for accurate record-keeping and easy retrieval, while also conducting candidate interviews on behalf of the academy for those who passed certification exams, ensuring a smooth evaluation process.

Skills

Database management • Team player • Excellent time management skills • Conflict management • Data analytics

Education

PRESENT

Gedik University Software Engineering Associate Program | Istanbul

Languages

Turkish (Native)• English (B2)

Activities

Literature • Environmental conservation • Art
